

PRACTICE QUESTIONS

1. Print numbers from 1 to 100 using a loop.
2. Print all even numbers between 1 and 100.
3. Print all odd numbers between 1 and 100.
4. Find the sum of numbers from 1 to n.
5. Print the multiplication table of a given number.
6. Count the number of digits in a given number.
7. Find the sum of digits of a given number.
8. Reverse a given number.
9. Check whether a number is a palindrome.
10. Find the factorial of a number.
11. Check whether a number is a prime number.
12. Print all prime numbers between 1 and 100.
13. Generate the Fibonacci series up to n terms.
14. Check whether a number is an Armstrong number.
15. Find the HCF (GCD) of two numbers using loops.
16. Print the following pattern:

```
*  
**  
***  
****  
*****
```

17. Print the following pattern:

```
1
12
123
1234
12345
```

18. Print the following pattern:

```
*****
****
***
**
*
```

19. Create a login system that allows only 3 password attempts. If the correct password is entered, display "Login Successful"; otherwise display "Account Locked".

20. Create a number guessing game where the user keeps entering guesses until the correct number is found. After each wrong guess, display whether the guess is too high or too low.
